

Capítulo 1

Task 00: Run the Project

1.1 Task Description

The goal of this task is to clone the repository and verify that the project runs successfully. The expected output is "Olá mundo!".

1.2 Planned Implementation

1. Clone the repository using the command:

```
1  git clone https://github.com/wedsonaf/metal_c.git
2
```

2. Navigate to the project directory.
3. Run the project using the `make run` command.
4. Verify the output is "Olá mundo!".
5. Exit the virtual machine using `ctrl+a x`.

1.3 Expected Outcome

- The project should compile and run successfully.
- The output should display "Olá mundo!".
- The virtual machine should terminate cleanly upon exit.

1.4 Implementation Details

(To be filled after implementation)

1.5 Challenges

(To be filled after implementation)

1.6 Final Outcome

(To be filled after implementation)
